TALA OSMAN

JUNIOR SOFTWARE ENGINEER · COMPUTER SCIENCE GRADUATE

talawww@hotmail.com • +961 78 841 333 • Zaarourieh, Chouf, Mount Lebanon, Lebanon
Portfolio: talaosman.netlify.app • Date of Birth: 23/07/2002

PROFILE

Computer Science graduate specializing in software development, currently working as a Junior Software Engineer building enterprise applications with Angular and .NET. Experienced in full-stack development (React, Spring Boot, ASP.NET Core, Laravel), cloud deployment on Azure, and AI-assisted development. Seeking a full-time or part-time role to apply and expand my technical skills while contributing to innovative development projects.

PROFESSIONAL EXPERIENCE

Junior Software Engineer — *Aperture Tech Solutions* *08/2026 – Present | Downtown, Beirut*
- Developing an insurance management system for MedGulf using Angular (frontend) and .NET (backend).
- Use AI coding agents such as Claude Code to accelerate development, refactoring, debugging, and testing.

Software Intern — *Dualcom Consulting / Nokia* *07/2025 – 09/2025 | Khaldeh*
- Worked on a project using React.js and Java Spring Boot with REST APIs.
- Integrated AI features to enhance system functionality.

.NET Developer Intern — *Inkript Resources Group* *01/2025 – 02/2025 | Beirut*
- Assisted in developing a real-world employee management system using C# and ASP.NET Core.
- Contributed to backend API development, database design, and Agile team collaboration.

Accounting & Finance Intern — *Sara Food Group* *04/2022 – 05/2022 | Khaldeh*
- Entered credit and debit transactions accurately and worked with the team to resolve financial issues.

EDUCATION

B.S. in Computer Science (Software Development) — *Antonine University* *09/2022 – 07/2026 | Baabda*

Lebanese Baccalaureate (General Sciences) — *Amjad High School, graduated Spring 2020* *2006 – 2020 | Choueifat*

PROJECTS

- **Rent House Web & Mobile App:** Full-stack rental platform: Spring Boot REST APIs with OTP email, Google/GitHub sign-up, Stripe payments, RAG-based AI chatbot, Google Maps, 360° virtual tours, and admin-only CRUD via middleware; responsive React.js frontend (search, view, rent, visit inquiries, favorites, auth) and a React Native mobile app. rental-house-website-ten.vercel.app
- **Delivery App:** Full-stack delivery platform in PHP Laravel, HTML/CSS, and JavaScript with Stripe payments and Firebase notifications; multi-role access, email verification, real-time GPS tracking, live chat, dynamic pricing, push notifications, multi-currency support, and admin tools for driver approvals, payments, reports, and loyalty programs.
- **Cloud Deployment — NJS-AZ-FRD (Node.js Azure Full Resource Deployment):** Hosted a Node.js application on Microsoft Azure with full resource setup: Web App, Functions, SQL, Key Vault, Storage, and CI/CD automation.
- **Heart Disease Prediction System:** Machine learning pipeline with preprocessing, model selection, and evaluation; multiple algorithms with hyperparameter tuning, plus CNN models explored for medical image-based prediction.
- **Medical Center Management System:** JavaFX/Java application with secure login, user management, and storage of patient files, appointments, and staff using databases and CSV files.
- **University Teacher Management:** C++ system using OOP, pointers, and linked lists to manage teachers and schedules, with feedback, teacher ranking, disk storage, and a visual interface.
- **Course Management System:** Java application helping students manage university courses, with CSV-based data persistence.
- **University Website & Travel Booking Website:** Responsive sites in HTML, CSS, JavaScript, and Bootstrap: a university portal (faculties, events, campuses, admission, sign-up) and a city tour guide (city management, feedback form, cross-device accessibility).

SKILLS & LANGUAGES

Languages	C++, C#, Java, JavaScript, Python, PHP, SQL, Assembly, HTML/CSS
Frameworks	Angular, React.js, React Native, .NET / ASP.NET Core, Spring Boot, Laravel, JavaFX, Bootstrap
Databases	MySQL, Oracle, MongoDB, SQL / NoSQL
Cloud & DevOps	Microsoft Azure, Azure DevOps, Docker, Vercel, Netlify, CI/CD
AI & Tools	AI coding agents (Claude Code), AI-assisted development, RAG (Retrieval-Augmented Generation), Figma, Adobe Illustrator & Photoshop, Windows
Soft Skills	Project management, time management, analytical thinking, problem solving, teamwork, leadership
Languages	Arabic, English, French

VOLUNTEERING

Volunteer — *Emir Majid Arslan Foundation* *03/2022 – 05/2022 | Choueifat*
- Input and organized client records in the archive office, helping clients access free medical care and medicines.

Volunteer — *Environmental Club, Amjad High School* *2017 – 2020 | Choueifat*
- Cleaned streets, forests, and nature reserves and planted trees in Faraya and Arz; attended lectures on climate change, pollution, and the environmental impact of everyday life.
